Affected Quantity:	25 kg (1 HDPE drum)

Complaint Description

During incoming quality inspection at our warehouse, the received drum of Metformin Hydrochloride API (Batch MFH260712A) was found to have a strong, unusual odour inconsistent with the reference standard. The Certificate of Analysis accompanying the shipment did not flag any deviation. We request immediate investigation into the root cause and confirmation of whether the remaining stock from this batch is safe to release for formulation use.

This complaint is being raised as a potential quality/GMP deviation and we request a formal CAPA response within the standard 15-business-day timeline as per our Quality Agreement.
